20L (25.6kg)

1000L (1280kg)

PRODUCT INFORMATION :

P-Focus is a highly efficient source of N-P-K based on high quality raw materials. The phosphates are present in the form of orthophosphate which are immediately available for plant absorption and metabolism. Especially useful during cold springtime conditions or wet springs, when phosphorus and potassium are less available from the soil. Available in 20L cans and 1000L IBC's

MIXING:

Fill the tank with the required amount of water.

Add the required fungicides and insecticides during the water filling.

Finally add the recommended amount of P-Focus.

Product/ supplier cannot be held responsible for crop damage as a result of adverse weather conditions or failure to follow the correct procedure for mixing and application.

ADVANTAGES OF USING P-FOCUS:

- Maximises solubility of nutrients and minimises salt index
- Minimises corrosion to equipment
- Can be stored at low temperatures
- Safe for the crop at recommended dose

APPLICATIONS RATES:

Application In Furrows

Maincrop Potato 55 l/ha	Maize 35 l/ha	Oilseed Rape 18 l/ha
Cereals 18 l/ha	Brassica Vegetables 65 l/ha	

Dissolved in a minimum of 50 litres water per hectare. If used in combination with fungicides/ insecticides dilute in 75 litres of water per hectare

Foliar Application

Maximum rate of 20 l/ha

Dissolved in 200 litres of water per hectare
